

Website Development Proposal

Prepared for: [Dr.Tamer Amer]

Prepared by: Omar Khaled

Date: [9/4/2026]

A. Project Overview

The project involves the design and development of a **professional corporate website** for a baby milk company.

The website will act as a **digital company profile**, allowing the client to present their business, products, and manufacturing capabilities to potential partners and customers.

The platform will focus on **credibility, visual presentation, and ease of communication**, enabling the client to share the website as a reference when engaging in business opportunities.

B. Key Features & Requirements

1. **Corporate Website Structure** including essential pages:
 - Home
 - About Us
 - Products
 - Contact
2. **Professional Company Presentation**
 - Overview of the company
 - Brand positioning and messaging
3. **Product Showcase**
 - Display of baby milk products
 - Optional detailed product pages [TO BE CONFIRMED]
4. **Manufacturing Representation**
 - Highlighting factory/manufacturing capabilities
 - Certifications and quality standards [TO BE PROVIDED]
5. **Contact & Lead Generation**
 - Display of contact information (phone, email, WhatsApp, etc.)
 - Contact form integration [TO BE CONFIRMED]

6. Media Integration

- Video embedding (if provided)
- High-end visual presentation and animations

7. Responsive Design

- Optimized for mobile, tablet, and desktop

8. Basic SEO Setup

- Structured pages for search engine visibility
-

C. Deliverables

1. Fully designed and developed corporate website
 2. Responsive UI across all devices
 3. Product showcase pages
 4. Contact page with integrated communication methods
 5. Media integration (images/videos provided by client)
 6. Basic SEO-ready structure
-

D. Milestones & Timeline

Timeline: [1.5 months]

Milestones:

- Phase 1: Design concept and layout approval
 - Phase 2: Website development and structure implementation
 - Phase 3: Content integration (text, images, videos)
 - Phase 4: Testing, revisions, and optimization
 - Phase 5: Final delivery and deployment
-

E. Technical Stack

- Frontend: Modern web technologies (HTML, CSS, JavaScript)
 - Framework: [React / Next.js / Static]
 - Hosting: [TO BE CONFIRMED]
 - Domain: [TO BE PROVIDED / CONFIRMED]
-

F. Project Cost

Total Cost: [30,000 EGP]

Payment Structure:

- 50% — Project start and requirement confirmation
 - 25% — After design and development completion
 - 25% — Upon final delivery
-

G. Notes

1. Content (text, images, videos) should be provided by the client unless otherwise agreed.
2. Any additional features outside the defined scope may affect both timeline and cost.
3. Hosting and domain costs are not included unless specified.
4. High-end animations depend on available assets and agreed scope.
5. Revisions will be handled within a reasonable scope during development.
